

Non-Allowables

Before your possessions are packed and loaded, it is important that you understand which items cannot be shipped because they represent a hazard or are perishable. Listed below are some common non-allowable items that you will need to address prior to your pack and load dates:

Hazardous Materials-items that are flammable, corrosive, or explosive

Examples include:

Aerosols

Ammonia

Ammunition

Car Batteries

Charcoal

Charcoal Lighter Fluid

Chemistry Sets

Cleaning Solvents

Fertilizer

Fireworks

Gasoline

Household Batteries

Kerosene

Lamp Oil

Liquid Bleach

Loaded Guns

Matches

Motor Oil

Nail Polish

Paint Thinner

Paints

Pesticides

Poisons

Pool Chemicals

Propane Tanks

Sterno

Weed Killer

Perishables-food, plants or living things that may die or spoil in transit.*

Examples include:

Frozen food

Open or Half-Used Foods

Plants

Produce

Refrigerated Foods

**For shipments moving less than 150 miles and delivered within 24 hours of pickup, carriers may agree to transport perishables that are properly packed and require no servicing in transit.

Note: You should empty your refrigerators and freezers and keep appliance doors open for at least 24 hours in advance of loading. This will allow the appliance to dry out and prevent the growth of mold.

Items of personal importance/sentimental value-This third category of "non-allowables", while not representing a physical threat, can create problems, should your shipment be delayed or items lost. The impact of a loss or delay can be lessened if irreplaceable, sentimental items are carried with you and not packed with your shipment.
